

THE ART OF SCIENCE

There is a science to monitoring aquatic housing.

Introducing the **AQUATOUGH** MONITORING

Aquaneering's newest development in Aquatic System Monitoring

Never again worry about your aquatic animals when you're away from the lab. Gain peace of mind with real time monitoring in the Lab and Online. Statistics are at your fingertips when you want them. The controls are so convenient and easy to use - it's intuitive.

Freedom and flexibility are yours when system readings can be viewed on the web server from anywhere with internet access.

Let the system maintain control when water levels get too low or total gas pressure gets too high - auto shut-off is built in.

History is preserved for you with data storage archiving.

You have the knowledge to maintain quality assurance with Multi-level alarms sent directly to your E-mail address or phone via SMS texts when readings exceed your pre-set levels.

We know how to help you keep tabs on your system, your animals, and your research.
